

DEBUGGING Exercise

TASK 1: Form Not Submitting (HTML + JS)

```
<form id="userForm">
  <input type="text" id="username">
  <button onclick="validate(event)">Submit</button>
</form>
function validate(e) {
  e.preventDefault()
  let name = document.getElementById("username").value;
  if (name === "") {
    alert("Name required");
  }
}
```

TASK 2: CSS Not Applying

```
.msg {
  color : blue;
  font-size: 20px;
}
```

TASK 3: Button Click Not Working (JS + DOM)

```
document.getElementById("btn").onclick = function () {
  alert("Clicked");
};
```

TASK 4: Validation Logic Error

```
let age = 16;
if (age >= 18) {
```

```
console.log("Eligible");
} else if (age < 18) {
  console.log("Not Eligible");
}
```

TASK 5: Input Value Always Empty

```
function check() {
  let email = document.getElementById("email").value;
  if (email === "") {
    alert("Email required");
  }
}
```

TASK 6: CSS Layout Breaking

```
.card {
  width: 300px;
  padding: 20px;
}
```

TASK 7: Password Match Validation

```
let pwd = "admin123";
let confirmPwd = "admin123 ";
if (pwd === confirmPwd.trim()) {
  console.log("Match");
} else {console.log("Mismatch");
}
```

TASK 8: Hidden Element Still Taking Space (CSS)

```
.alert {
  display: none;
}
```

TASK 9: JS Error Stops Script

```
console.log("Start");  
alert("Hello")  
console.log("End");
```

TASK 10: Checkbox Validation

```
function submitForm() {  
  if (terms.checked) {  
    alert("Accept terms");  
  }  
}
```

TASK 11: Assignment instead of comparison

```
function validate() {  
  let mobile = document.getElementById("mobile").value;  
  if ((mobile.length === 10)) {  
    alert("Valid");  
  } else {  
    alert("Invalid");  
  }  
}
```

TASK 12: Policy Holder Name Validation

```
function validateName() {  
  let name = document.getElementById("policyName").value;  
  if (name === "") {  
    alert("Policy holder name required");  
  }  
}
```

TASK 13: Insurance Plan Dropdown Validation

```
function checkPlan() {  
  let plan = document.getElementById("plan").value;  
  if ((plan === "Select Plan")) {  
    alert("Please choose a plan");  
  }  
}
```

TASK 14: Policy Number Display Bug

```
let policyNumber = 123456;  
document.getElementById("policy").innerHTML = policyNumber;
```

TASK 15: Claim Amount Validation

```
let claimAmount = "abc";  
if (!isNaN(Number(claimAmount))) {  
  alert("Valid claim");  
} else {alert("Invalid claim");  
}
```

TASK 16: Policy Type Comparison Error

```
let policyType = "Health";  
if (policyType.toLowerCase() === "health") {  
  console.log("Health Policy");  
}
```

TASK 17: Policy List Rendering Bug

```
let policies = ["Life", "Health", "Vehicle"];  
policies.forEach(function (policy) {  
  document.getElementById("list").innerHTML += policy + "<br/>";  
});
```

TASK 18: Premium Amount Validation

```
let premium = "5000";  
if (isNaN(Number(premium))) {  
  console.log("Invalid premium");  
} else {  
  console.log("Valid premium");  
}
```
