

.Net Day1 Assignment

1. Write a C# Sharp program to print Hello and your name in a separate line.

```
namespace demo;
internal class MyClass
{
    static void Main(string[] args)
    {
        string n=Console.ReadLine();
        Console.WriteLine("Hello");
        Console.WriteLine(n);
    }
}
```

```
Rohith Reddy
Hello Rohith Reddy

C:\Training\.Net\Dotnet\demo\bin\Debug\net8.0\demo.exe (process 34624) exited with code 0 (0x0).
Press any key to close this window . . .
```

2. Write a C# Sharp program to print the sum and division of two numbers.

```
namespace demo;
internal class MyClass
{
    static void Main(string[] args)
    {
        string[] num = Console.ReadLine().Split();
        int num1 = int.Parse(num[0]);
        int num2 = int.Parse(num[1]);
        sum(num1, num2);
        divide(num1, num2);
    }
    static void sum(int num1, int num2)
    {
        Console.WriteLine(num1+num2);
    }
    static void divide(int num1, int num2)
    {
        Console.WriteLine(num1 / num2);
    }
}
```

```
6 3

2

C:\Training\.Net\Dotnet\demo\bin\Debug\net8.0\demo.exe (process 11632) exited with code 0 (0x0).
Press any key to close this window . . .
```

3. Write a C# program that removes a specified character from a non-empty string using the index of a character.

```

namespace demo;
internal class MyClass
{
    static void Main(string[] args)
    {
        string n = Console.ReadLine();
        Console.WriteLine(n.Remove(3,1));
        Console.WriteLine(n.Remove(4,1));
        Console.WriteLine(n.Remove(5,1));
    }
}

```

```

rohth123
rohih123
rohit123

```

```

C:\Training\.Net\Dotnet\demo\bin\Debug\net8.0\demo.exe (process 25340) exited with code 0 (0x0).
Press any key to close this window . . .

```

4. Write a C# Sharp program that takes a positive number and returns the nth odd number.

```

namespace demo;
internal class MyClass
{
    static void Main(string[] args)
    {
        int[] nums = Array.ConvertAll(Console.ReadLine().Split(), int.Parse);
        int r = int.Parse(Console.ReadLine());
        int no=0;
        int p = 0;
        while (r > 0 && p<nums.Length)
        {
            if (nums[p] % 2 != 0)
            {
                no = nums[p];
                r--;
            }
            p++;
        }
        Console.WriteLine(no);
    }
}

```

```

1 3 2 4 5 6 7
4
7

```

```

C:\Training\.Net\Dotnet\demo\bin\Debug\net8.0\demo.exe (process 12120) exited with code 0 (0x0).
Press any key to close this window . . .|

```

5. Write a C# Sharp program that takes a number and a width also a number. It then displays a triangle of that width using that number.

```

namespace demo;
internal class MyClass
{
    static void Main(string[] args)
    {
        int h = int.Parse(Console.ReadLine());
        int w=int.Parse(Console.ReadLine());
        for(int i = 0; i < h; i++)
        {
            for(int j=0; j < w-i; j++)
            {
                Console.Write(h);
            }
            Console.WriteLine();
        }
    }
}

```

```

7
C:\Training\.Net\Dotnet\demo\bin\Debug\net8.0\demo.exe (process 5884) exited with code 0 (0x0).
Press any key to close this window . . .

```

6. Write a C# program that prompts the user to input two numbers and divides them. Handle an exception when the user enters non-numeric values.

```

namespace demo;
internal class MyClass
{
    static void Main(string[] args)
    {
        try
        {
            int num1 = int.Parse(Console.ReadLine());
            int num2 = int.Parse(Console.ReadLine());
            if (num2 != 0){
                double result = num1 / num2;
                Console.WriteLine("Result: " + result);
            }
            else { Console.WriteLine("Divide by 0 error"); }
        }
        catch (Exception ex){
            Console.WriteLine("An error occurred: " + ex.Message);
        }
    }
}

```

```
5
r
An error occurred: The input string 'r' was not in a correct format.
C:\Training\.Net\Dotnet\demo\bin\Debug\net8.0\demo.exe (process 33236) exited with code 0 (0x0).
Press any key to close this window . . .|
```

7. Write a C# Sharp program to read age of a candidate and determine whether it is eligible for casting his/her own vote.

```
namespace demo;
internal class MyClass
{
    static void Main(string[] args)
    {
        int age= int.Parse(Console.ReadLine());
        if (age < 18)
        {
            Console.WriteLine("Wait "+( 18 - age)+" years");
        }
        else
        {
            Console.WriteLine(" You are eligible");
        }
    }
}
```

```
15
Wait 3 years
C:\Training\.Net\Dotnet\demo\bin\Debug\net8.0\demo.exe (process 26988) exited with code 0 (0x0).
Press any key to close this window . . .
```
